KWorld Intros SA233 External Analogy TVBox

Audio and Peripherals | Just Announced
Mon 19 Jul 2010

SHARE

Manila, Philippines -- KWorld announced the availability of the SA233 external analogy TVBox that enables wide screen viewing with high resolution up to 1920 x 1200 on a monitor and supports more channels preview from 2x2, 3x3 to 3x4. The KWorld SA233 also includes the feature of build-in speaker of 1.5W sound power with a compact size.

Extending KWorld's successful line of external analogy TVBox, this generation of KWorld's SA233 is design to further enhance video & audio experiences, along with esthetic concepts. In response to the popularity of high resolution TV, the KWorld's SA233 provides maximum resolution up to 1920x1200 on user's monitor, saving extra TV cost. The PIP function allows users to simultaneously use the computer while watching any TV program. Users can easily switch PC/TV function just by one-click on the remote. The channel preview function enables viewers to easily search either the channel they are looking for or the one that matches their interest. All of these features are ideal to reduce user's time consumption. The build-in speaker allows viewer to enjoy stereo audio effect without needing to plug in any cable.

The slim design of KWorld's SA233 derives from KWorld product esthetics concept that conveys one of the product's added values along with good design. The KWorld SA233 is smaller size (L) 14.2x (W) 9x (H) 2.6cm compared to other TVBox brands. In addition, the stylish streamline shape covered with silver color, the KWorld SA233 TV Box could be recognized as a fashionable and elegant electronic product at user's home.
