KWorld Presents UD165 Portable Multimedia Converter

Mobile Solutions | Just Announced
Tue 20 Apr 2010

SHARE

Manila, Philippines -- One monitor is not enough? Worry about no display tool to present what's in your laptop on a wide screen? KWorld presented the solution – Multimedia Converter UD165. Though in a portable, comparably small size, it displays what's in your PC or laptop to a wide TV or projector screen on a high resolution up to 1920x1080. On the other hand, if you are looking for a tool that helps you multitask, this is the product designed for you. It has the ability to connect itself to extra monitors, so that you can view different contents in multiple monitors.

The ability of multi-task has now been the crucial factor in work efficiency. For instance, an officer worker may have to make a report on Excel, search information on Google, and coordinate with colleagues on MSN all at one time. However, mistakes could arise as multiple windows are minimized, maximized, opened or closed on one monitor. To make work more efficient, the Multimedia Converter UD165 can connect it to another monitor, so that you have "more space" to view different windows. For example, you can look at your stock exchange on one monitor while doing your work on the other, making it more effective and error-free.

This multimedia converter UD165 is also the ideal companion for presentations. Just hook it to a wide TV or projector screen, it will deliver your PC or laptop contents with a high resolution standard up to 1920x1080. The viewers of your presentations will see clear images without the bizarre parts that are delivered by ordinary PC-To-TV products. Besides, it is in a portable size that makes you easy to carry it.
