

## » For The Motherboard Enthusiast

Calling all motherboard enthusiasts, there's another item to expect this November! MSI will be adding the **X58** to its collection of motherboards. The latest high-end model dubbed as, 'Eclipse', promises the highest form of efficiency. With a much better platform, expect greater performance from the Eclipse. It will be the first three-channel memory structure read motherboard to support 6 DIMM DDR3-1333 slots for up to 24GB capacity. **Price: TBA**

[www.msi.com.tw](http://www.msi.com.tw)

- >>Support for Intel Core i7 processors with QPI 6.4GT/s
- >>DrMOS equipped on CPU PWM, QPI, and Northbridge
- >>Support GreenPower & APS (Active Phase Switching) system
- >>DrMOS dedicated heat-pipe design

## Zoom Your Way To Entertainment

Lamborghini's decided to switch gears to develop a DVB-T tuner with KWorld Company Co. instead. The **Impatto UB385-T** allows you to watch free-to-air digital terrestrial TV and listen to tunes from the digital radio on your PC or laptop. Not only that, it's now possible to get clear reception with the DVB-T tuner whilst you're on-the-move, wherever you are. With its HyperMedia Center Lamborghini Edition, expect to scour through the user-friendly browser and access to 9 preview channels at once (3 x 3 channels) for maximum enjoyment. **Price: TBA**

## Against The Elements

While it is not exactly the most minuscule Bluetooth headset around, the **Plantronics Explorer 370** more than makes up for its shortcomings in size. Tailored for the outdoors, the device is water, shock and dust resistant. It's designed to go through the worst possible conditions without compromising on sound quality. One thing to note though, the durable headset lacks noise-cancelling circuitry which may affect call quality at times. **Price: S\$139**
