Listed 09 Jul 2008

**Taipei, Taiwan, 10 July, 2008**—KWorld Computer Co., Ltd., the leading maker of PC based TV tuners, has recently launched the sleek **Hybrid Slider TV Stick, (DVB-T 323U)** in Australia.

The semi-transparent arc and slider cover not only enhances the style of the unit, it's also a safety mechanism to avoid losing the cap, which is not only frustrating, but prevents it from being found or swallowed by kids.

The DVB-T 323U slider TV stick is the size of half a credit card. It's portable, and easy to take from home to work, or bring away with you on a business trip. This portable TV tuner allows users to enjoy the full benefits of television entertainment, on the move & in style!

The KWorld hybrid DVB-T 323U TV stick is small, but it still carries a complete set of functions, including: worldwide support for analogue TV, support for DVB-T Digital TV (SD & HDTV), Time-Shifting, S.R.P.O (Scheduled Recording in Power-Off Mode), PIP (Picture-in-Picture), Pause, Timeshifting, etc. Never miss any of your favorite TV shows or football games again!

The TV stick is compatible with both MCE (DVB-T Digital only) & Vista.

More information about KWorld DVB-T 323U is available at [www.kworld.com.tw](http://www.kworld.com.tw).
